

The Digital Decaf Cinema Bundle

The DSLR Cinema Bundle is the premier solution for true cinema-style features, weight, and stability. This bundle provides a full size “microMatteBox” and “microFollowFocus”, all designed to current cinema specifications. The “microSupport” cage provides protection and side rods for mounting, and the top “microHandle” delivers a convenient place to hold the rig, and use for low mode shooting (handle is attached to the cage for strength. It is not attached to the camera’s hot shoe). These same accessories can be used with any video camera and even the Red Digital Cinema cameras with minor add-ons. The DSLR Cinema Bundle is perfect for anyone shooting primarily with tripod, and wants to emulate the film style results found in big screen motion pictures.

DSLR Field Cinema Deluxe Bundle

The DSLR Field Cinema Bundles v2 are a robust shoulder-mounted rigs designed for maximum stability and ruggedness. These bundle has been revised to include the most popular configuration of our field cinema bundle, and are used on professional shows such as Fox's House MD. The Deluxe bundle includes the "microBalance" Plus adjustable counterbalance weights, "microHandle" mounted to the main rails, and "microFollowFocus" v2. The Field Cinema Bundles are designed for use with an external video monitor. If you prefer a shoulder-mount rig with eyepiece/viewfinder, consider the eyeSpy line of cinema rigs.

Digi-D Micro Eye Spy Deluxe

Sometimes the shoot requires a little more direct connection with the eyeball and camera. For a more traditional shoulder-mount shooting style we offer the EyeSpy rigs. EyeSpy starts with the shoulder-pad, 18" 15mm carbon fiber rods, and single rubberized hand-grip from the popular "microShoulderMount". We've added an additional rod extension to center the camera for viewfinder use, and topped it off with the DSLR baseplate, and "microFinder" loupe accessory.

Add on's:
